**How much does it cost to run your TV set?**

Less than 1¢ an hour—morning noon or night. Any size TV.

Quite a bargain, isn't it?

In fact, electricity in Edison areas costs an average family less per kilowatt-hour today than it did 10...20...even 30 years ago. And practically everyone today is using much more electricity—more kilowatt-hours—than ever before.

Take washing dishes. Few people owned electric dishwashers a decade ago. But now you see them everywhere. And you can wash a load for less than 2¢.

Or washing clothes. Remember when this was a hand operation? With an electric washer, you can now run through a load for less than 1½¢.

Or shaving. Electric razor sales are booming. And you can shave all year for less than a dime.

In Edison areas, one of your biggest bargains is electricity. It does so much for so little. You can watch TV around the clock and it hardly costs you a thing. (Except maybe a night's sleep.)
